

Testimonials from the PACS studio:

When I first came (to PACS), I thought I could only come once because of my neck, but the table easel made it possible to come two times a week. Every time I did something simple, I felt so eager and content. One time I came really depressed, but I start with something simple and I feel so good. I feel confidence, spontaneous, happy and excited. ~ Nury Costillo

About the Rosie and Gertrude Art-shops:

It was good to have something different. The exercises made me ask "Who am I?" It pulled me out of my comfort zone very gently. The exercises were 'ho hum' but challenging. I thought it would be routine, but it was an adventure. ~ Studio Participant
